AIR 3207 (GATE CS 2025) | AIR 4358 (GATE DA 2025) | MERN Stack Developer | Data Analyst | Passionate about Building Dynamic Web Applications and Deriving Insights from Data
Vishakhapatnam, Andhra Pradesh, India

Summary

Hi! I'm Avinash Kumar, a passionate and versatile web developer and data enthusiast. As a BTech CSE student with hands-on experience in the MERN stack, I've developed dynamic web applications that address real-world challenges. My skills in MongoDB, Express.js, React.js, and Node.js enable me to create scalable and efficient web solutions.

In parallel, my experience as a Data Analyst has honed my ability to transform raw data into actionable insights. Through projects involving SQL, Excel and Power BI, I've delivered insights that contribute to informed decision-making and business optimization.

Driven by a strong desire to continuously learn and take on new challenges, I'm eager to apply my skills in both web development and data analytics. Whether it's building the next big web app or uncovering hidden patterns in data, I'm excited to collaborate with like-minded professionals and organizations. Let's connect and create something remarkable together!

Experience

Uni Conn | Raising Pre - Seed
Full-Stack Web Developer
September 2024 - October 2024 (2 months)

Mentorness
Data Analyst
May 2024 - June 2024 (2 months)
